

Utilization Management

A medical services solution with benefits for your employees and your bottom line

The Utilization Management Program monitors, evaluates and manages the costs and quality of healthcare services delivered to customers of Community Health Partners. A local staff consisting of a medical director and a team of registered and licensed practical nurses review inpatient and outpatient procedures and services to determine medical necessity and cost-efficiency.

Program components include:

- Pre-admission and admission review.
- Concurrent hospital stay review.
- Case Management and Disease Management (SmartChoice).
- Referral authorization for a specialist or out-of network care.
- Outpatient service and ambulatory review.
